Vlad Alexandru Rogna
Programmer and Web developer

About

I'm a **web designer** and **programmer** specialized in creating useful applications and great websites. I've been in the field for more than **5 years** and have been loving every second of it! I'm an entrepreneur, designer, developer and overall a thinker.

I have experience in all phases of the project life cycle - **analysis**, **design**, **coding**, **debugging**, **testing**, **deployment**, **implementation** and **monitoring**.

My working experience is the proof that I can be an excellent asset to your company. Find more details about me and my portfolio of projects on my website alexrogna.com

Technical Skills

Skill	%		Skill	%
Ruby	58%		Rails	58%
HTML	67%		CSS	72%
Javascript	48%		Wordpress	34%
Databases	58%		Linux	41%
Git	51%		DevOps	60%

* These percentages are calculated using data uploaded on my website alexrogna.com, they represent how much I used these skills in my projects, plus a little extra from every book I read and every course I attended.

Personal Skills

Problem solving - In my mind, there's no problem without a solution. When I have a problem, I divide it into small parts and solve each one separately. After defining all possible solutions, I try to choose the best ones.

Adaptability - As a freelancer, I had to adapt myself to changes very often - different clients, areas, tools and technologies.

Communication - Having a continuous exchange of information with my clients helped me to be able to express my ideas and implement the proposals from them.

Keen eye for detail - I zoom in and verify every small detail in order to obtain better results, always keeping in mind how they could affect the success of the project.

Self-motivation - Successfully completing one project and moving on to the next one is very exciting for me. I'm passionate about my work and truly enjoy working towards the next big goal.

Willingness to learn - I'm very excited to discover new tools and technologies by reading books, taking online courses and experimenting.

Planning - I'm a strategic planner, skilled in multitasking and prioritizing work tasks to meet any deadline.

Time management - I like to make every day a to-do list for myself that includes the tasks I need to complete within that day.

Punctuality - It's really important to me to be punctual and I understand how important it is also for the team and for the organizational success.

Language Skills

English - Advanced

German - Beginner

Romanian - Native
